1. Executive Summary

Advance Telecom aims to strengthen and expand its distribution network by gaining comprehensive visibility into market dynamics, dealer behavior, product availability, pricing trends, and competitor presence across its target territories.

To achieve this objective, we propose a comprehensive **Survey Management System** consisting of:

- A **Mobile Application for TSOs** to conduct field surveys and capture market intelligence.
- A **Mobile Application for Management** to monitor business performance, market trends, and field activities.
- A **Web-Based Portal for BDMs** to monitor assigned TSOs, review survey activities, and manage territory performance.
- A **Web-Based Administration & Analytics Portal** for system configuration, user management, survey management, and reporting.

The proposed solution will enable:

- Real-time market data collection and survey execution.
- Product availability and competitor presence tracking.
- Competitor pricing and market intelligence analysis.
- Dealer insights and purchasing behavior analysis.
- TSO activity monitoring and performance tracking.
- BDM-level team monitoring and territory management.
- Executive dashboards and business intelligence reporting for management.
- Data-driven decision-making to support distribution growth and market expansion initiatives.

By digitizing the survey process and providing end-to-end visibility from field operations to executive management, the solution will help Advance Telecom identify market opportunities, improve distribution coverage, and make faster, more informed business decisions.

2. Our Solution

We propose a comprehensive Survey Management System consisting of a **Mobile Application for TSOs**, a **Mobile Application for Management**, and a **Web-Based Portal for BDMs and Administrators**. The solution will digitize field survey activities and enable real-time collection of market intelligence, including product availability, pricing, competitor presence, and dealer insights.

The system will provide centralized data management, dynamic survey configuration, and powerful reporting dashboards. BDMs will be able to monitor the activities of their assigned TSOs, while Management will have complete visibility into field operations, territory performance, market trends, and competitor analysis through both mobile and web platforms.

With real-time reporting and analytics, Advance Telecom will be able to make faster, data-driven decisions to optimize distribution strategies, improve market coverage, and identify growth opportunities.

3. Scope of Work

Discovery, Planning & Design

- Requirement finalization through stakeholder discussions
- Definition of survey structure, workflows, and data points
- Identification of product categories, brands, and competitor tracking requirements
- User role definition and territory mapping
- Reporting and dashboard requirements gathering

System Design (UX/UI & Architecture)

- Mobile application design for TSOs and Management
- Web portal design for BDMs, Administration, and Reporting
- Survey workflow and shop visit journey design
- Dashboard and analytics design
- Role-based access and system architecture design

Mobile Application Development (TSO & Management)

- Secure login and role-based access
- Assigned shop listing and search
- Shop visit and survey submission
- Product availability, pricing, and competitor data capture
- Payment terms, source tracking, and reason capture
- Geo-tagged visits and photo capture
- Price history and survey history
- Offline data entry with synchronization
- Executive dashboards and reporting for Management
- Android and iOS applications

Web Portal Development (BDM, Management & Administration)

- User management with role and territory assignment
- BDM and TSO mapping
- Shop, product, category, and competitor brand management
- Dynamic survey form configuration
- Territory and assignment management
- BDM monitoring dashboard for TSO activities
- Management dashboards and analytics
- Reporting and competitor analysis

Data Management & Reporting

- Centralized data storage and validation
- Survey and activity tracking
- Price comparison and trend analysis
- Competitor and market intelligence reporting
- Territory and performance reports
- Exportable reports (Excel/PDF)

4. Core Features

Functional Features

These describe all **user-facing and administrative capabilities**.

TSO Mobile Application

Features	Description	Flow (Step-wise)
Secure Login	Role-based login for TSO users	Login → Verification → Dashboard
Assigned Shops View	View assigned shops based on territory	Login → Load Shops → Display List/Map
Shop Profile Management	View and update dealer/distributor/wholesaler details	Select Shop → View/Edit Profile → Save
Shop Visit Module	Record and manage market visits	Select Shop → Start Visit → Complete Survey → Submit
Dynamic Survey Form	Configurable survey forms from backend	Start Survey → Load Questions → Submit Responses
Product Availability Capture	Capture available products and brands	Select Category → Select Product → Save
Product Specification Capture	Capture model, capacity, warranty, voltage, IP rating, etc.	Select Product → Enter Specifications → Save
Price Data Entry	Capture buying and selling prices	Select Product → Enter Prices → Save

Features	Description	Flow (Step-wise)
Competitor Tracking	Capture competitor products, brands and pricing	Select Competitor → Enter Details → Save
Source of Buying Capture	Capture supplier source (Dealer/Distributor/Wholesaler)	Select Product → Select Source → Save
Payment Terms Capture	Capture dealer payment terms	Select Payment Type → Add Details → Save
Incentive & Trade Program Capture	Capture discounts, commissions, gift cards, loyalty programs, foreign trips, etc.	Select Program Type → Enter Details → Save
Brand Perception Survey	Capture dealer feedback on pricing, quality, warranty, service support, margins and demand	Answer Questions → Submit
Dealer Interest Tracking	Capture willingness to keep/promote Advance Telecom products	Select Interest Level → Add Remarks → Save
Reason Capture (Non-Availability)	Record reasons for product non-availability	Select Reason → Add Comments → Submit
Photo Capture	Capture shop, product and competitor branding photos	Open Camera → Capture → Upload
GPS Location Capture	Geo-tag market visits and surveys	Start Visit → GPS Captured Automatically
Price History Tracking	View historical pricing records	Open History → Select Date → View
Offline Data Capture	Complete surveys without internet	Save Offline → Sync Later

Management Mobile Application

Features	Description	Flow (Step-wise)
Secure Login	Role-based login for management	Login → Verification → Dashboard
Executive Dashboard	View overall KPIs and business insights	Login → Dashboard Loads
Regional Performance Dashboard	Region-wise performance analysis	Select Region → View KPIs
Territory Performance Dashboard	Territory-level monitoring	Select Territory → View Metrics
BDM Performance Tracking	Monitor BDM productivity and performance	Select BDM → View KPIs
TSO Performance Tracking	Monitor TSO activity and survey completion	Select TSO → View Metrics
Survey Analytics	Survey completion and response trends	Select Period → View Analytics
Competitor Price Analysis	Compare competitor pricing trends	Select Competitor → View Analysis
Competitor Product Analysis	Compare competitor products and specifications	Select Product → Compare
Brand Perception Dashboard	Analyze dealer sentiment and market feedback	Open Dashboard → View Insights
Market Intelligence Dashboard	View dealer insights and market opportunities	Open Dashboard → Review Findings
Dealer Opportunity Tracking	Identify potential dealers and growth opportunities	Open Dashboard → View Opportunities
Reporting	View and download reports	Select Report → Apply Filters → Download

BDM Web Portal

Features	Description	Flow (Step-wise)
Secure Login	Role-based access for BDM users	Login → Verify → Dashboard
Team Dashboard	Monitor assigned TSOs	Open Dashboard → View Team KPIs
TSO Activity Monitoring	Monitor TSO visits and daily activities	Select TSO → View Activities
Survey Monitoring	Monitor submitted, pending and overdue surveys	Select Survey → View Status
Territory Performance Dashboard	Monitor territory-wise performance	Select Territory → View KPIs
Shop Coverage Analysis	Track covered and uncovered shops	Select Territory → View Coverage
Dealer Opportunity Tracking	Monitor potential dealer opportunities identified by TSOs	Open Dashboard → Review Opportunities
Brand Perception Analytics	Analyze dealer feedback and market sentiment	Open Dashboard → View Analysis
Competitor Analysis	Monitor competitor pricing and activities	Select Competitor → View Insights
Team Reporting	Generate TSO and territory reports	Select Report → Apply Filters → Export

Admin & Management Web Portal

Features	Description	Flow (Step-wise)
Secure Login	Role-based access for Admin and Management	Login → Verify → Dashboard
User Management	Create and manage users and roles	Add User → Assign Role → Save
Role & Permission Management	Configure what modules, screens, reports and actions are visible to each role	Create/Edit Role → Select Permissions → Save
Menu Access Control	Control which menus and screens are accessible to users	Select Role → Assign Menus → Save
Dashboard Access Control	Configure dashboards visible to specific users or roles	Select Role → Select Dashboards → Save
Report Access Control	Restrict report visibility and exports based on role	Select Role → Assign Reports → Save
BDM-TSO Mapping	Assign TSOs to BDMs	Select BDM → Assign TSOs → Save
Territory Management	Manage regions, areas and territories	Create Territory → Assign Users → Save
Shop Management	Manage retailers, dealers and distributors	Add/Edit Shop → Save
Product & Category Management	Manage products, categories and specifications	Add/Edit Product → Save
Competitor Brand Management	Manage competitor brands and products	Add Competitor → Save
Survey Configuration	Create dynamic survey forms and questions	Create Survey → Add Questions → Publish
Pricing Management	Maintain pricing and price history	Add Price → Save
Trade Program Management	Configure payment terms, incentives and schemes	Create Program → Save
Reporting & Analytics	Generate operational and executive reports	Select Report → Apply Filters → Export

Features	Description	Flow (Step-wise)
Competitor Analysis Dashboard	Analyze competitor pricing and products	Open Dashboard → View Analysis
Brand Perception Dashboard	Analyze dealer sentiment and brand feedback	Open Dashboard → View Insights
Excel/PDF Export	Export reports and dashboards	Select Export Format → Download

5. Project Timeline

Activity	Duration	Notes
Discovery, Existing Data Review & Survey Template Finalization	10 Days	Requirement workshops, survey sheet analysis, existing data review, field mapping, business process understanding, scope finalization
UX/UI Design, Wireframes & Prototype Approval	8 Days	Mobile and web screens, survey workflows, dashboards, user journeys, clickable prototype and client approval
Mobile Application Development	15 Days	TSO Mobile App and Management Mobile App, survey engine, GPS tagging, photo capture, offline synchronization and dashboards
Admin Portal Development	8 Days	User management, role management, territory mapping, survey configuration, product and shop management
Management & BDM Web Portal Development	10 Days	Management dashboards, BDM monitoring portal, reporting, analytics and competitor insights
Data Management, Synchronization & Reporting Setup	4 Days	Database configuration, validations, reporting datasets and synchronization mechanisms
Testing & UAT	8 Days	Functional testing, bug fixing, UAT support and feedback incorporation
Deployment, Training & Go-Live Support	5 Days	Production deployment, user onboarding, training and go-live support

Total Estimated Duration

68 Working Days (Approximately 2.7 Months)

6. Technology Stack & Architecture

Web Front-end: Next.js (React Framework), HTML5, CSS3, Tailwind CSS

Web Back-end: .NET or Laravel

Database: MySQL

Infrastructure: Cloud hosting

Mobile App: Flutter (Android / IOS)

7. Financial Proposal

One-Time Implementation Cost

Cost Component	Description	Amount
Mobile App Android / IOS	TSOs and Management	1,500,000
Web Portal	BDMs, Management Analytics View	
Web Admin Portal	Configuration, Operations, Dashboard and Reporting	
Total One-Time Cost	Complete system delivery	1,500,000

Pricing Notes:

- All prices are in PKR
- Third-party license fees, API subscriptions, or integration costs are separate and billed directly by client.
- Milestone-based payments to be agreed.

8. Payment Terms

Terms	%	Amount
Advance	30%	450,000
Completion of Mobile Apps & Testing	30%	450,000
Completion of Web Portals & Testing	30%	450,000
After Deployment, Training & Go-Live	10%	150,000
